

SWISS TECHNOLOGY AWARD
THE LEADING TECHNOLOGY PRIZE IN SWITZERLAND

Innovations are a key driver of the Swiss economy. They ensure our prosperity. The presentation of the Swiss Technology Award supports and promotes this culture of innovation. Each year, outstanding technology-based innovations and developments from start-ups, universities and technical institutions as well as established businesses are awarded prizes in three categories.

This prize is the most important distinction for innovation and technology transfer in Switzerland. The Swiss Technology Award was taken over from the Swiss Economic Forum AG in 2008 and will be presented for the 31st time at the Swiss Innovation Forum 2019.

ONLINE APPLICATION

By 23 August 2019

Registration on our online platform.

PRELIMINARY JURY

11 September 2019

Detailed examination of the submitted dossiers and nomination of the three finalists in each category.

MAIN JURY

30 October 2019

The finalists give their presentations in front of the main jury in Zurich.

AWARD CEREMONY

21 November 2019

All the finalists are given the opportunity to present their innovation in a pitch at the Swiss Innovation Forum in front of a top-class audience of more than 1,000 participants. The winners of the individual categories are then selected immediately afterwards.

WHO CAN APPLY?

- Innovative entrepreneurs
- Innovative projects from research institutions
- Business and industry start-ups
- University and college projects
- Established companies with innovative, technology-based developments

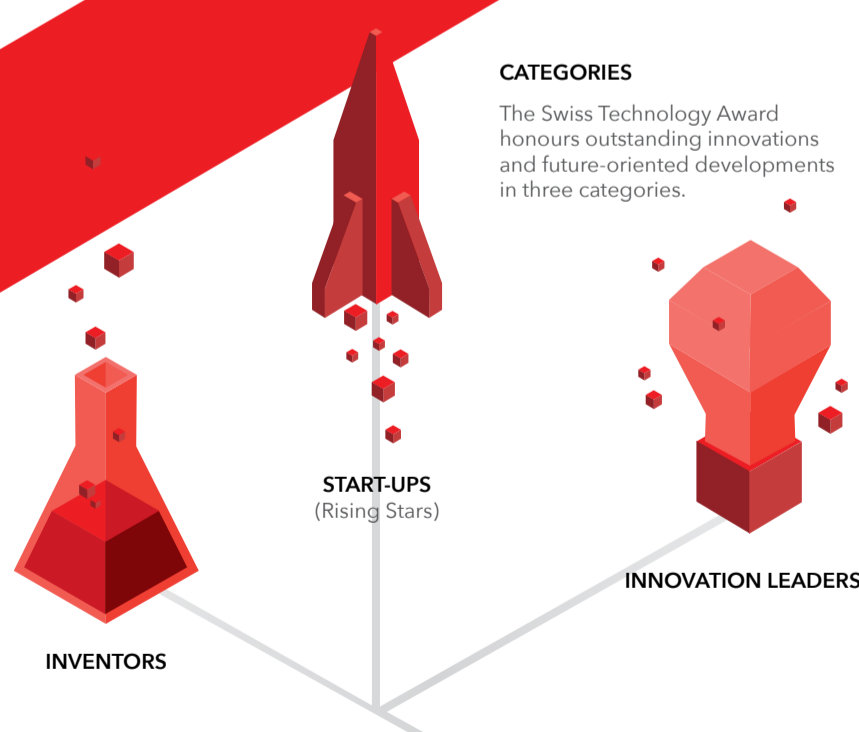

CONDITIONS OF PARTICIPATION

To participate, must be satisfied the following requirements:

- The innovation was developed in Switzerland or further developed by a company/institution based in Switzerland.
- The innovation can be judged to be particularly innovative and unique in terms of its technological and economic application and its potential in the marketplace.
- The innovation makes an important contribution to meeting industrial and social needs.

CATEGORIES

The Swiss Technology Award honours outstanding innovations and future-oriented developments in three categories.

BENEFITS AND ADDED VALUE

The Swiss Technology Award is more than just a trophy. The winners will receive a comprehensive support package:

- Participation at an international trade fair
- Video showcasing their company and the innovation
- Elevator pitch at the Swiss Innovation Forum in front of 1,000 decision-makers from business, politics, science and media
- Extensive media exposure and marketing support
- Simplified access to the SEF4KMU growth initiative

It does not take long to fill in the application; you can even do it over several sessions using your personal login.

INFORMATION AND CONTACT

Further information can be found on our website. For questions about the application process or the registration platform, please contact:

Phone: 033 334 23 24 or award@swiss-innovation.com

The Swiss Innovation Forum is Switzerland's leading innovation conference and a unique platform for promoting creativity, design and innovation. Carefully selected speakers present forward-looking ideas, the latest technologies and current trends. Specific examples from business practice are also showcased along with academic articles.

In addition to a varied programme and the presentation of the Swiss Technology Award, it is primarily the opportunities for cross-sector networking that have made the Swiss Innovation Forum so popular among representatives from industry, academia and politics over many years.

YOUR GROWTH IS OUR MISSION

Young companies face various structural, personnel and capacity-related challenges during the growth phase. Initial orders have been received and generate turnover, but also additional expenses. At the same time, the company needs to be adapted to the changes in growth. During this phase, it is worthwhile to seek input from outside and take known success factors into account. The Swiss Economic Forum's growth initiative (SEF4KMU) connects you with the right experts to successfully master the challenges of growth. Particularly promising companies are awarded the "SEF.High-Potential SME" quality label and benefit from modules such as financing, risk management and innovation protection. Swiss Technology Award finalists are granted easier access to this growth initiative.
